DETAILED ACTION

1. This Office Action is the answer to the communication filed on April 9, 2008, which paper has been placed of record in the file.
2. Claims **1-12** are pending in this application.

Allowable Subject Matter/Reasons for Allowance

3. Claims **1-3** and **8-12** are allowed over the prior arts cited records.

The closest prior arts are:

1) Fite (US 6,467,684) discloses use of pre-paid cards for transactions offered by particular merchants accepting the pre-paid cards. The Fite card vendor terminal requires a card reader for receiving and reading the card identification number from the magnetic strip (see, col. 3, lines 10-18). As such, the pre-paid cards are restricted to use for purchases from certain merchants who accept the pre-paid card for payment (see, col. 1, lines 52-57 and col. 3, lines 53-65).

2) Boesch (US 5,897,621) discloses linking customer and merchant accounts including identity thereof for executing a multicurrency transaction. In Boesch, a server maintains a customer account associated with a customer user and a merchant user (see, column 4, lines 10-17) to identify the customer and the merchant based on the stored information related to the customer and merchant (see, column 5, lines 53-65).

3) Cohen (US 6,505,171), similar to Fite, is directed to handling purchasing transactions using pre-paid cards as the medium of exchange between a purchaser and

certain merchants (see, col. 7, lines 11-15 of Cohen regarding information request from the consumer including shipping and billing addresses, method of payment, credit card numbers, expiration dates, and other pertinent payment information").

4) Risafi (US 6,473,500) allows a card user to purchase a prepaid card issued by an issuer, such as a bank, and use the card to purchase goods and services. Similar to Boesch, the Risafi card is associated or linked with the purchaser or a particular user and cannot be used by anyone else (see, col. 7, lines 50-55 and col. 8, lines 43-52). That is, Risafi requires that identity of a user be associated with the prepaid card so that only the identified user is able to use the prepaid card to execute a transaction (i.e., requires that the PIN associated with the card be verified).

Therefore, it is clear from the description of Fite's, Boesch's, Cohen's and Risafi's inventions that the prior arts do not considered the possibility of: transaction means performing monetary transactions with said bearer bond as a payment by converting the monetary value of said bearer bond for use with existing payment protocols, as included in claim 1; an electronic document for performing transactions using the electronic document as a payment by converting a value of said electronic document for user with for user with existing payment protocols, as included in claim 2; executing an electronic transaction by using the second valued of the second currency as payment for the item without linking identity of parties to execute the electronic transaction, thereby creating a universal form of payment acceptable by any merchant that users an existing payment protocol, as included in claim 3; a database for performing monetary transactions with electronic online bearer bond as a payment

by converting the monetary value of said bearer bond for user with existing payment protocols, **as included in claim 8**; executing the electronic transaction using the issued interactive electronic bearer document as a form of payment by converting the monetary electronic said bearer document for user with existing payment protocols upon presentation of the assigned verification information, **as included in claim 9**; executing the electronic transaction using the interactive electronic bearer document as a form of payment with respect to an existing accepted form of payment, **as included in claim 10**, converting a value of the first form of payment into a universally accepted form of payment, thereby creating a universally accepted form of payment as requested by the user, **as included in claim 11**; using the electronic document as a payment to merchant employing an existing payment protocol including credit cards, **as included in claim 12**.

4. Claims 4-7 are allowed because they are dependent claims of the allowable independent claim 3 above.

Conclusion

5. Claims **1-12** are allowed.
